

20 years BioTeSys GmbH – Two reasons to celebrate!

Esslingen, 2020.01.20,

This year BioTeSys GmbH celebrates its 20th anniversary. At the same time, the company is preparing itself for the demands of the coming third decade. "I am very pleased that the long-standing authorised signatory and head of the "Nutritional CRO" department, Mrs Christiane Schön, has been won over for the position of a second managing director," explains CEO and founder Dr. Jürgen Bernhardt. Together, we will succeed in retaining our previous strengths such as high flexibility and intensive and very trustworthy customer communication, while at the same time meeting the management requirements in the context of the company's growth. "I am very much looking forward to the upcoming challenge," adds Mrs. Schön, "and will do everything in my power to support the positive development as a test laboratory and nutritional CRO in recent years and to continue to develop it together with Dr. Bernhardt."

Mrs. Christiane Schön has a degree in nutritional science and has been with the company since 2001. Mrs. Schön has played a major role in building up the service portfolio around the issues of clinical studies in the area of food, dietary supplements and FSMP and has been managing the department very successfully for years. Mrs. Schön is a sought-after speaker for questions of scientific substantiation of product-related claims in the fields of food, cosmetics and medical devices as well as for questions of the delimitation to drug law.
